MEGADORA Insulated Screwdrivers

No.960 / 960PS PAT.

Insulated Screwdrivers Series
certified by VDE,
International certification authority.

1000V AC or less, 1500V DC or less

1000V
IEC60900

VDE is an authorized third-party
certification organization.

**Reliable - 100% Energization
(Dielectric) Inspection
Conducted!**

against electric shock
For protection

Applications

For prevention of electric shock, short-circuit during electric works for power equipment, telecommunication devices, electric vehicles, solar power stations, and so on.

MEGADORA VDE

Highly precise tip-end
(black oxide finish)

Chrome-vanadium steel,
fully hardened

Safe and secured
double insulation layer

STOP using the screwdriver
when its yellow layer comes out.

Flat Surface Grip

Soft and hard grip with combination of stepless and stain-free smooth product line and surface. Always large area of contact between the hand and the product, however it is held.

Non-slip process on 3 surfaces even with oily hand.

Commonly available screwdrivers with a shank cover is for the purpose of **short-circuit prevention**, NOT for **electric shock prevention**. The VDE mark is allowed to be on a product which **has passed** the 1000V energization test (**all pieces**).

Also, this mark proves that the product has passed other 6 **severe tests**, apart from this 1000V test. Highly recommended to **use VED marked insulated tools**, with measures against unexpected electric shock taken, especially for the high voltage work which may induce serious **electrification accidents**.

1000V

⚠ WARNING!

- NEVER USE FOR HOT-LINE JOB. RISQUE OF ELECTRICAL SHOCK.
- Make sure in advance that the usage environment is less than 1000V AC, 1500V DC.
- USE INSULATED GLOVES WHEN WORKING WITH THIS SCREWDRIVER.
- Insulation is applied only to the grip and the red shank cover.
- STOP IMMEDIATELY using this screwdriver when the yellow shank cover comes out or there is a damage or alike on the product.

● For safety purposes, read the instruction manual carefully before using the unit. ● Do not use this product in an explosion-proof area. ● A high voltage is applied on this product. Make sure that water, oil, solvents, etc., do not come in contact. ● Avoid dew condensation as it can result in electric shock or product damage. ● Keep away metal objects such as tools or needles, or body parts such as fingers, hands or face from the needle electrode because a high voltage is applied on the needle electrode.
